

CONSOLE RECYCLING STATION

240L

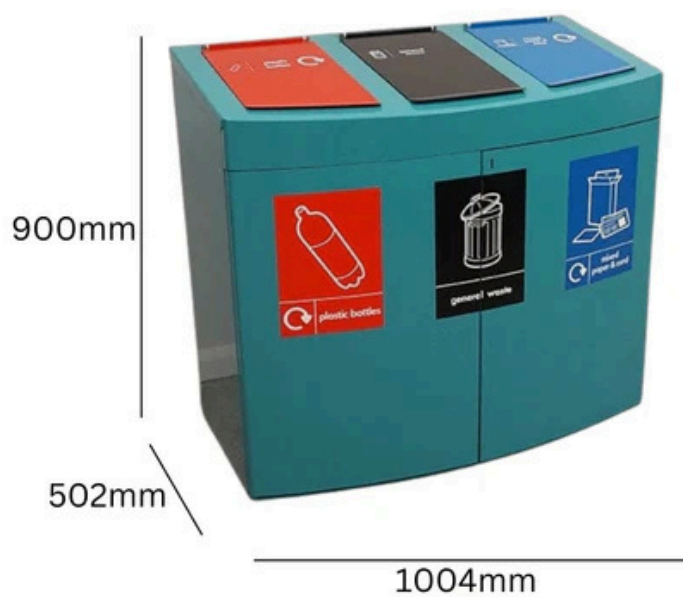

240L
Capacity

Powder-coated galvanised steel

Rust, weather, and corrosion resistant

TECHNICAL SPECIFICATIONS

CONSOLE RECYCLING STATION **240L**

FEATURES

- High-capacity receptacle with three apertures for the collection and separation of three different types of waste.
- Robust powder-coated steel shell for optimal weather-resistance, and it is fully customisable with the apertures of your choice.
- The Console Recycling Station features three removable 80-litre inner compartments for a combined total capacity of 240-litres.
- Access the liners via magnetic doors and remove them with ease thanks to their integrated handles.
- With the central aperture reserved for general waste, you can collect both everyday rubbish and recyclables in this compact and convenient recycling bin.

SPECIFICATIONS

- Powder-coated galvanised steel.
- Rust, weather, and corrosion resistant.
- Magnetic access doors.
- Centre aperture for general waste, left and right apertures for recyclables.
- Optional A4 recycling graphics available separately.
